D32
OPEN

INTRODUCING THE NEW **D32 OPEN**

The D32 is an innovative model that joins the range of yachts under 10 meters and is part of the new generation in design and performance that began with the D36 model. Its exterior lines and design improvements enhance the modern and sporty character of the brand. Following the philosophy of all the models of the brand, special attention has been paid to the development of a high performance hull to offer a navigation that exceeds all expectations.

The “walkaround” type deck has a unique distribution of spaces and, as a novelty, the D32 incorporates an exterior galley, which improves the performance and experience on deck. The interior distributes an open space with two cabins and a separate bathroom. This new model designed with a compact concept but with all the comforts of larger lengths, offers more than remarkable levels of quality and performance, ideal for sportsmanship lovers in navigation and the comfort of their spaces.
