The Power Catamaran (2021) is a 20-meter yacht built with a durable fiberglass hull, offering both stability and elegance on the water. With a beam of 6 meters, it provides ample space across three cabins and five comfortable berths. Powered by twin Perkins diesel engines delivering 71 HP each and only 250 working hours, it ensures reliable and efficient performance. Equipped with a flybridge, this vessel combines functionality and comfort, ideal for leisurely cruising or extended voyages.
