## Description

The Farr 45 is a popular sailing yacht designed by the well-known naval architect Bruce Farr. The 45-foot model was introduced in the mid-1990s and has gained a reputation for its performance, versatility, and good handling characteristics both in racing and cruising contexts.

**Design and Build:** The Farr 45 typically features a high-performance hull shape designed for speed and stability. It often includes a deep keel and a built-in rudder for better manoeuvrability and with Carbon deck.

**Sailing Performance:** The Farr 45 is known for its excellent performance under sail, making it popular among racing enthusiasts and competitive sailing communities.

**Interior Layout:** Depending on the specific model and any customizations, the interior may offer a comfortable living space with sleeping quarters, a galley, and a head (bathroom). The layout can vary, so it's essential to check the specific boat for details.

**Racing and Cruising:** While it is often utilized for racing, the Farr 45 can also be equipped for cruising, making it adaptable to different sailing styles.
